Topology: Point-Set and Geometric

Paul L. Shick

Topology: Point-Set and Geometric Paul L. Shick

The essentials of point-set topology, complete with motivation and numerous examples

Topology: Point-Set and Geometric presents an introduction to topology that begins with the axiomatic definition of a topology on a set, rather than starting with metric spaces or the topology of subsets of \mathbb{R}^n . This approach includes many more examples, allowing students to develop more sophisticated intuition and enabling them to learn how to write precise proofs in a brand-new context, which is an invaluable experience for math majors.

Along with the standard point-set topology topics—connected and path-connected spaces, compact spaces, separation axioms, and metric spaces—Topology covers the construction of spaces from other spaces, including products and quotient spaces. This innovative text culminates with topics from geometric and algebraic topology (the Classification Theorem for Surfaces and the fundamental group), which provide instructors with the opportunity to choose which "capstone" best suits his or her students.

Topology: Point-Set and Geometric features:

- A short introduction in each chapter designed to motivate the ideas and place them into an appropriate context
- Sections with exercise sets ranging in difficulty from easy to fairly challenging
- Exercises that are very creative in their approaches and work well in a classroom setting
- A supplemental Web site that contains complete and colorful illustrations of certain objects, several learning modules illustrating complicated topics, and animations of particularly complex proofs

From reader reviews:

Sheila Powell:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or goal; it means that publication has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are really reading whatever they have because their hobby will be reading a book. How about the person who don't like looking at a book? Sometime, person feel need book if they found difficult problem or even exercise. Well, probably you'll have this Topology: Point-Set and Geometric.

Gina Dana:

Now a day individuals who Living in the era everywhere everything reachable by connect to the internet and the resources in it can be true or not require people to be aware of each data they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading through a book can help folks out of this uncertainty Information mainly this Topology: Point-Set and Geometric book because book offers you rich data and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it you may already know.

Charlotte Womble:

This Topology: Point-Set and Geometric is completely new way for you who has intense curiosity to look for some information since it relief your hunger of information. Getting deeper you into it getting knowledge more you know or you who still having little bit of digest in reading this Topology: Point-Set and Geometric can be the light food for you because the information inside that book is easy to get simply by anyone. These books build itself in the form and that is reachable by anyone, sure I mean in the e-book type. People who think that in e-book form make them feel drowsy even dizzy this publication is the answer. So there isn't any in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book sort for your better life and knowledge.

Jeffery Harman:

As a scholar exactly feel bored to reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Topology: Point-Set and Geometric can make you really feel more interested to read.
