Marine and Coastal Geographical Information Systems (Research Monographs in GIS)

Marine and Coastal Geographical Information Systems (Research Monographs in GIS)

Marine and coastal applications of GIS are finally gaining wide acceptance in scientific as well as GIS communities, and cover the fields of deep sea geology, chemistry and biology, and coastal geology, biology, engineering and resource management. Comprising rigorous contributions from a group of leading scholars in marine and coastal GIS, this book will inspire and stimulate continued research in this important new application domain.

Launched as a project to mark the UN International Year of the Ocean (1998) and supported by the International Geographical Union's Commission on Coastal Systems, this book covers progress and research in the marine and coastal realms, in the areas of theory, applications and empirical results. It is the first book of its kind to address basic and applied scientific problems in deep sea and coastal science using GIS and remote sensing technologies. It is designed for GIS and remote sensing specialists, but also for those with an interest in oceans, lakes and shores. Coverage ranges from seafloor spreading centres to Exclusive Economic Zones to microscale coastal habitats; and techniques include submersibles, computer modelling, image display, 3-D temporal data visualization, and development and application of new algorithms and spatial data structures. It illustrates the broad usage of GIS, image processing, and computer modelling in deep sea and coastal environments, and also addresses important institutional issues arising out of the use of these technologies.

From reader reviews:

Homer Anderson:

As people who live in the actual modest era should be update about what going on or information even knowledge to make these individuals keep up with the era and that is always change and advance. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to a person is you don't know which one you should start with. This Marine and Coastal Geographical Information Systems (Research Monographs in GIS) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Eric Beckman:

Is it an individual who having spare time in that case spend it whole day by means of watching television programs or just lying down on the bed? Do you need something new? This Marine and Coastal Geographical Information Systems (Research Monographs in GIS) can be the solution, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these ebooks have than the others?

Robert Stitt:

Do you like reading a book? Confuse to looking for your chosen book? Or your book had been rare? Why so many query for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but in addition novel and Marine and Coastal Geographical Information Systems (Research Monographs in GIS) as well as others sources were given know-how for you. After you know how the good a book, you feel desire to read more and more. Science book was created for teacher or perhaps students especially. Those ebooks are helping them to bring their knowledge. In different case, beside science publication, any other book likes Marine and Coastal Geographical Information Systems (Research Monographs in GIS) to make your spare time more colorful. Many types of book like here.

Haley Thacker:

Some individuals said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half elements of the book. You can choose the actual book Marine and Coastal Geographical Information Systems (Research Monographs in GIS) to make your personal reading is interesting. Your own skill of reading talent is developing when you including reading. Try to choose easy book to make you enjoy to study it and mingle the opinion about book and reading through especially. It is to be first opinion for you to like to open up a book and study it. Beside that the book Marine and Coastal Geographical Information Systems (Research Monographs in GIS) can to be your friend when you're experience alone and confuse in what must you're doing of that time.
