Science for Engineering John Bird

A practical introduction to the engineering science required for engineering study and practice.

Science for Engineering is an introductory textbook that assumes no prior background in engineering. This new edition covers the fundamental scientific knowledge that all trainee engineers must acquire in order to pass their exams, and has been brought fully in line with the compulsory science and mathematics units in the new engineering course specifications.

John Bird focuses upon engineering examples, enabling students to develop a sound understanding of engineering systems in terms of the basic laws and principles. This book includes over 580 worked examples, 1300 further problems, 425 multiple choice questions (with answers), and contains sections covering the mathematics that students will require within their engineering studies, mechanical applications, electrical applications and engineering systems.

- Colour layout helps navigation and highlights key learning points, formulae and exercises
- Understanding can be tested with the 580 worked examples, 1300 further problems and 425 multiple choice questions contained within the book
- Focuses on real-world situations and examples in order to maximise relevance to the student reader

This book is supported by a companion website of materials that can be found at www.routledge/cw/bird, this resource including fully worked solutions of all the further problems for students to access for the first time, and the full solutions and marking schemes for the revision tests found within the book for lecturers/instructors use. In addition, all 433 illustrations will be available for downloading by staff.

From reader reviews:

Phyllis Richards:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each e-book has different aim as well as goal; it means that e-book has different type. Some people really feel enjoy to spend their time and energy to read a book. They are really reading whatever they consider because their hobby is reading a book. What about the person who don't like examining a book? Sometime, particular person feel need book if they found difficult problem or perhaps exercise. Well, probably you will need this Science for Engineering.

Lucas Florio:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As you may know that book is very important normally. The book Science for Engineering was making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The reserve Science for Engineering is not only giving you more new information but also being your friend when you truly feel bored. You can spend your own spend time to read your e-book. Try to make relationship with the book Science for Engineering. You never feel lose out for everything if you read some books.

Emily Meredith:

Beside that Science for Engineering in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you may got here is fresh from the oven so don't always be worry if you feel like an aged people live in narrow small town. It is good thing to have Science for Engineering because this book offers to you readable information. Do you occasionally have book but you would not get what it's facts concerning. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss this? Find this book along with read it from at this point!

Betsy Aguilar:

Reserve is one of source of knowledge. We can add our expertise from it. Not only for students and also native or citizen have to have book to know the upgrade information of year in order to year. As we know those textbooks have many advantages. Beside we add our knowledge, can also bring us to around the world. With the book Science for Engineering we can take more advantage. Don't you to be creative people? For being creative person must like to read a book. Just simply choose the best book that appropriate with your aim. Don't become doubt to change your life with that book Science for Engineering. You can more inviting than now.
