Dynamics in Psychology: Vital Applications of Gestalt Psychology Wolfgang Kohler

"The positive and broad approach to difficult problems makes this book stimulating reading."—*The Psychiatric Quarterly*

Along with Freud, Jung, Adler, and William James, Wolfgang Kohler, co-founder of Gestalt Psychology, is one of the most valuable and innovative thinkers in modern psychology. *Dynamics in Psychology* is his most important statement of the application of the Gestalt approach to psychological thinking generally and to perception and memory in particular. He argues here that psychological theories cannot be restricted to the realm of psychology proper, that they must refer to biological and physical concepts. Kohler's scientific precision and continual respect for the whole human being gives his work its lasting value.
