Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography) Giovanni Ferraris, Emil Makovicky, Stefano Merlino

This is the first book to provide a comprehensive treatment of theories and applications in the rapidly expanding field of the crystallography of modular materials. Molecules are the natural modules from which molecular crystalline structures are built. Most inorganic structures, however, are infinite arrays of atoms and some kinds of surrogate modules, e.g. coordination polyhedra, are usually used to describe them. In recent years the attention has been focused on complex modules as the basis for a systematic description of polytypes and homologous/polysomatic series (modular structures). This representation is applied to the modelling of unknown structures and understanding nanoscale defects and intergrowths in materials. The Order/Disorder (O.D.) theory is fundamental to developing a systematic theory of polytypism, dealing with those structures based on both ordered and disordered stacking of one or more layers. Twinning at both unit-cell and micro-scale, together with disorder, causes many problems, "demons", for computer-based methods of crystal structure determination. This book develops the theory of twinning with the inclusion of worked examples, converting the "demons" into useful indicators for unravelling crystalline structures. In spite of the increasing use of the concepts of modular crystallography for characterising, understanding and tailoring technological crystalline materials, this is the first book to offer a unified treatment of the results, which are spread across many different journals and original papers published over the last twenty years.

From reader reviews:

Georgia Hernandez:

Have you spare time for the day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a move, shopping, or went to the particular Mall. How about open or maybe read a book allowed Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography)? Maybe it is for being best activity for you. You know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have some other opinion?

Theodore Huff:

The reserve untitled Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography) is the book that recommended to you to learn. You can see the quality of the reserve content that will be shown to an individual. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of study when write the book, to ensure the information that they share for you is absolutely accurate. You also might get the e-book of Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography) from the publisher to make you considerably more enjoy free time.

Lydia Baum:

Spent a free a chance to be fun activity to complete! A lot of people spent their leisure time with their family, or all their friends. Usually they doing activity like watching television, going to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Might be reading a book could be option to fill your free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the guide untitled Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography) can be fine book to read. May be it may be best activity to you.

Kevin Hardy:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is composed or printed or illustrated from each source this filled update of news. Within this modern era like at this point, many ways to get information are available for an individual. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Crystallography of Modular Materials (International Union of Crystallography Monographs on Crystallography) when you essential it?
