Shadow Factories: Britain's Production Facilities and the Second World War David Rogers

Wartime is costly. Whilst the human cost is a burden which remains part of our every waking thoughts for many years after the end of the conflict, the physical cost, at least in some cases, is easier to deal with.

Some, if not most of the physical cost of war, is spent in the constant supply of materials including armaments and machines to the troops – wherever they happen to be fighting. Of course the Services have always needed supplies of uniforms, equipment and machines. However, the rate of expansion of the Services and the rate of consumption of armaments increases dramatically in wartime. Pre-war traditional manufacturers simply could not cope with the sudden increase in orders.

The only solution was to fabricate what was needed, in the Second World War at least, in additional factories. Shadow Factories was the term used to describe the use of third party factories and equipment used to manufacture components or complete units which were then passed on to the Services. These units could be anything from tanks, parts of aircraft to small pumps or rifles. The list was almost endless.

Clearly it would be impossible to walk into the nearest engineering shop and expect them to manufacture heavy components. The railway yards were used to dealing with heavy blocks of metals and so they were approached to help with heavier vehicles such as tanks. Similarly the motor manufacturers were asked to help out with producing trucks and jeeps, for example.

Of course this need necessitated formal contracts, and as far as possible discretion so that the German bombers could not locate and destroy vital sources of supplies. In some cases, such was the level of secrecy that components for aircraft for example, were fabricated in a number of shadow factories and assembled in a different location. In that way the exact engineering drawings could be more easily controlled and a stray bomb would only destroy part of the plans and planes.

Where relevant, examples are provided from across the United Kingdom and cover an extensive range of machines and vehicles. Some details will also be provided concerning armament shells, some of which were made in one site and filled in other facilities. The government departments were certainly kept busy keeping track of it all!

From reader reviews:

Florence Wiggins:

Hey guys, do you really want to find a new book to study? Maybe the book with the headline Shadow Factories: Britain's Production Facilities and the Second World War suitable to you? Often the book was written by renowned writer in this era. The actual book entitled Shadow Factories: Britain's Production Facilities and the Second World War is a single of several books in which everyone reads now. This specific book was inspired a lot of people in the world. When you read this publication you will enter the new dimensions that you ever know before. The author explained their plan in the simple way, therefore all of people can easily understand the core of this e-book. This book will give you a large amount of information about this world now. To help you to see the represented of the world within this book.

Jerry Osbourne:

Shadow Factories: Britain's Production Facilities and the Second World War can be one of your beginning books that are good idea. We all recommend that straight away because this reserve has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to place every word into joy arrangement in writing Shadow Factories: Britain's Production Facilities and the Second World War although doesn't forget the main place, giving the reader the hottest in addition to based confirm resource info that maybe you can be among it. This great information can draw you into brand new stage of crucial contemplating.

Stephen Galvan:

Beside this particular Shadow Factories: Britain's Production Facilities and the Second World War in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you might get here is fresh from the oven so don't end up being worry if you feel like an old people live in narrow small town. It is good thing to have Shadow Factories: Britain's Production Facilities and the Second World War because this book offers to your account readable information. Do you sometimes have book but you would not get what it's all about. Oh come on, that will not happen if you have this within your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. So do you still want to miss that? Find this book in addition to read it from currently!

Jeffrey Blough:

What is your hobby? Have you heard that will question when you got pupils? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person including reading or as examining become their hobby. You should know that reading is very important and book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them is this Shadow Factories:

Britain's Production Facilities and the Second World War.
