Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation) Miquel Feixas, Anton Bardera, Jaume Rigau, Qing Xu, Mateu Sbert
Information Theory (IT) tools, widely used in many scientific fields such as engineering, physics, genetics, neuroscience, and many others, are also useful transversal tools in image processing. In this book, we present the basic concepts of IT and how they have been used in the image processing areas of registration, segmentation, video processing, and computational aesthetics. Some of the approaches presented, such as the application of mutual information to registration, are the state of the art in the field. All techniques presented in this book have been previously published in peer-reviewed conference proceedings or international journals. We have stressed here their common aspects, and presented them in an unified way, so to make clear to the reader which problems IT tools can help to solve, which specific tools to use, and how to apply them. The IT basics are presented so as to be self-contained in the book. The intended audiences are students and practitioners of image processing and related areas such as computer graphics and visualization. In addition, students and practitioners of IT will be interested in knowing about these applications.

From reader reviews:

Jose Murry:

This Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation) usually are reliable for you who want to be described as a successful person, why. The explanation of this Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation) can be one of several great books you must have is usually giving you more than just simple looking at food but feed a person with information that perhaps will shock your prior knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in e-book and printed people. Beside that this Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation) forcing you to have an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day pastime. So , let's have it appreciate reading.

Trevor Wright:

People live in this new day of lifestyle always try and and must have the extra time or they will get lots of stress from both way of life and work. So , once we ask do people have time, we will say absolutely without a doubt. People is human not really a huge robot. Then we question again, what kind of activity do you possess when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, typically the book you have read is usually Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation).

Meredith Bailey:

Playing with family in a park, coming to see the marine world or hanging out with friends is thing that usually you have done when you have spare time, and then why you don't try point that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation), you are able to enjoy both. It is great combination right, you still want to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its called reading friends.

Jamie Norman:

As a college student exactly feel bored for you to reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the teacher want, like asked to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful pictures on

there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Information Theory Tools for Image Processing (Synthesis Lectures on Computer Graphics and Animation) can make you really feel more interested to read.
